WHY VENDORS CHOOSE IT

Built for the way real shops work

Whether you run one till at a market stall or several branches across town, seiGEN Commerce Lite gives you the same control a big retailer has — on the phone or computer you already own.

No internet? No problem.

After the first open, every feature — selling, stock, reports, end of day — works fully offline. Power cuts and data bundles don't stop your trading.

Runs on what you have

Use it on an Android phone, a tablet or a Windows computer. Install it like an app or simply open a single file — no expensive till hardware needed.

Your records stay with you

Sales, stock and customer records are stored on your own device. Staff PINs, Admin passcodes and audit trails keep every change accountable.

Grows with your business

Start with one shop. Add remote branches later, send stock between them with Delivery Notes, and see every branch's numbers in one place.

WhatsApp-friendly

Send receipts, reports, payment reminders and data files straight to WhatsApp — the way your customers and managers already talk.

Know where every dollar goes

Blind cash counts, payouts, variance, margins and seed-money recovery show you exactly how the business is really doing.

4+

payment methods,
plus split tender

Everything at the counter

Selling & checkout

- Find products fast by name, SKU, barcode or hidden search keywords
- Cash, EcoCash, Bank and Credit — with payment references recorded
- Split one sale across several payment methods
- Line-item and whole-sale discounts, each with a reason and approval
- Quick-tap checkout for the busiest moments

Multi-currency

- Accept payment in other currencies alongside your base currency
- You set the exchange rates — no live feed or internet needed
- See the cart total in a customer's currency before they pay
- Every tender is recorded in the currency actually received

Receipts & invoices

- Thermal receipts sized for 58mm or 80mm printers
- Proper A4 invoices for credit customers, with balance due
- Send any receipt to the customer on WhatsApp in one tap
- Your shop name and banner on every document

Works with your hardware

- USB & Bluetooth barcode scanners — for selling and stock counts
- USB thermal receipt printers, no driver needed (Chrome)
- Cash drawer that opens on your command
- Or use no hardware at all — a phone is enough

Credit customers

- Credit sales create customer accounts automatically
- Record payments and see who owes what at a glance
- Send polite payment reminders on WhatsApp
- Customer directory for WhatsApp marketing messages

Reward loyal customers

- Automatic frequent-customer vouchers you configure
- e.g. "5 purchases in 30 days earns a \$2 voucher"
- Voucher badge shows at checkout — apply in one tap
- Customer Report shows your best buyers

Shifts & End of Day — close the day properly

- Start each shift by declaring the opening cash float
- Log payouts taken from the drawer, with a reason
- Blind cash count — staff count first, then reveal the variance
- Print or WhatsApp the End of Day report to management
- New sales wait until yesterday's day has been closed
- Tamper-resistant clock protects your dates and records

WHAT IT DOES FOR YOU

Behind the counter

Products & stock

- Photo, SKU, price, cost and stock for every product
- Bulk-import your inventory from Excel or CSV
- Stock adjustments for damage, expiry, theft or miscount — Admin approved
- Print A4 product catalogues and marketing cards

Stocktakes

- Blind counting so staff aren't influenced by system numbers
- Scan or search items while you count
- Variance report before anything changes
- Apply counts to live stock only when you confirm

Purchasing & receiving

- Record stock you buy in, with cost, from any supplier
- Track how much of your starting capital sales have recovered
- Customer Requests notepad — never forget what people asked for

Multiple branches

- Main branch controls products, prices and costs
- Remote branches sell from the main branch's catalogue
- Send stock with Delivery Notes; confirm with a GRV
- Merge every branch's data on a head-office device

Staff & security

- Each staff member signs in with a personal PIN
- Every sale, discount and stock change is recorded against a name
- Admin passcode protects settings, prices and adjustments
- Costs and margins hidden from remote branches

Backups & sharing

- Export your data file any time — automatic backup before imports
- Clearly named files: shop, branch, date and time
- Share data files straight through WhatsApp
- Export items and reports to Excel

GETTING STARTED

Up and selling in minutes

No technician, no server, no monthly hardware bills. If you have a phone or computer, you're ready.

1

Get the app

Install it from a link, or open the single app file we send you.

2

Set up your shop

Enter your shop name, branch, currency and contact number.

3

Add products

Type them in, or import your whole list from Excel.

4

Start selling

Open a shift, declare your float, and ring up your first sale.

MADE FOR

Tuck shops & grocers

Pharmacies & clinics

Hardware & spares

Boutiques & salons

Wholesalers & distributors

Market & street vendors

Try it free for 30 days.

Every new setup includes a full 30-day trial with all features switched on. After that, keep going with a simple monthly activation code — just send us the code shown in the app.
